

SIRIUS[®] SATELLITE RADIO

Home Signal Distribution Options

SIRIUS Outdoor Antenna
(with SMA Connector)

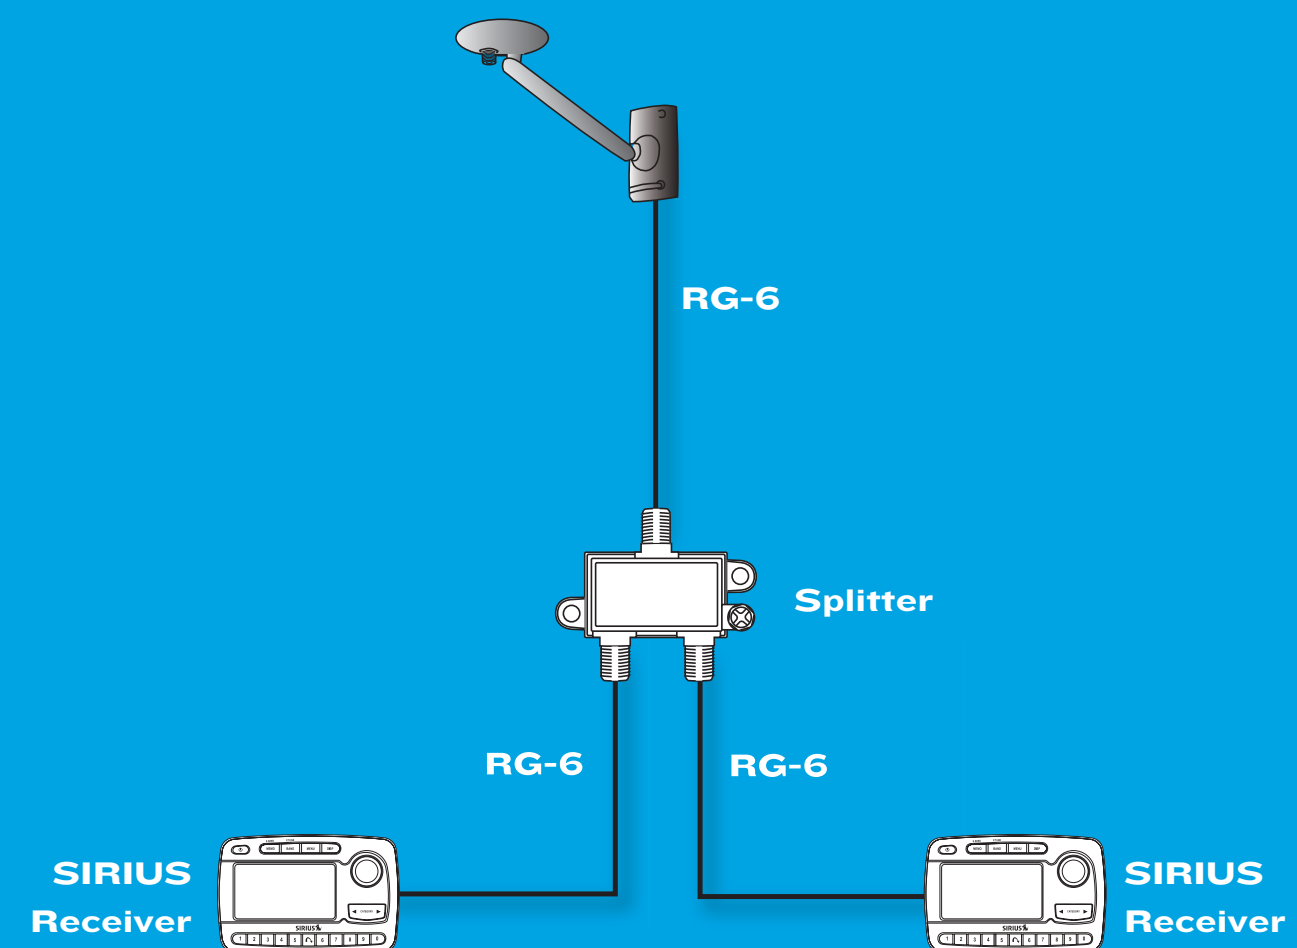

Home Outdoor Antenna

- ▶ Specifically designed to receive signal from the SIRIUS satellites and ground repeaters when mounted outdoors
- ▶ Adjustable design lets you position antenna for maximum signal reception
- ▶ Can be mounted on a pole/mast, on the roof or on a wall
- ▶ Comes with 30' RG-58 cable and mounting hardware

New

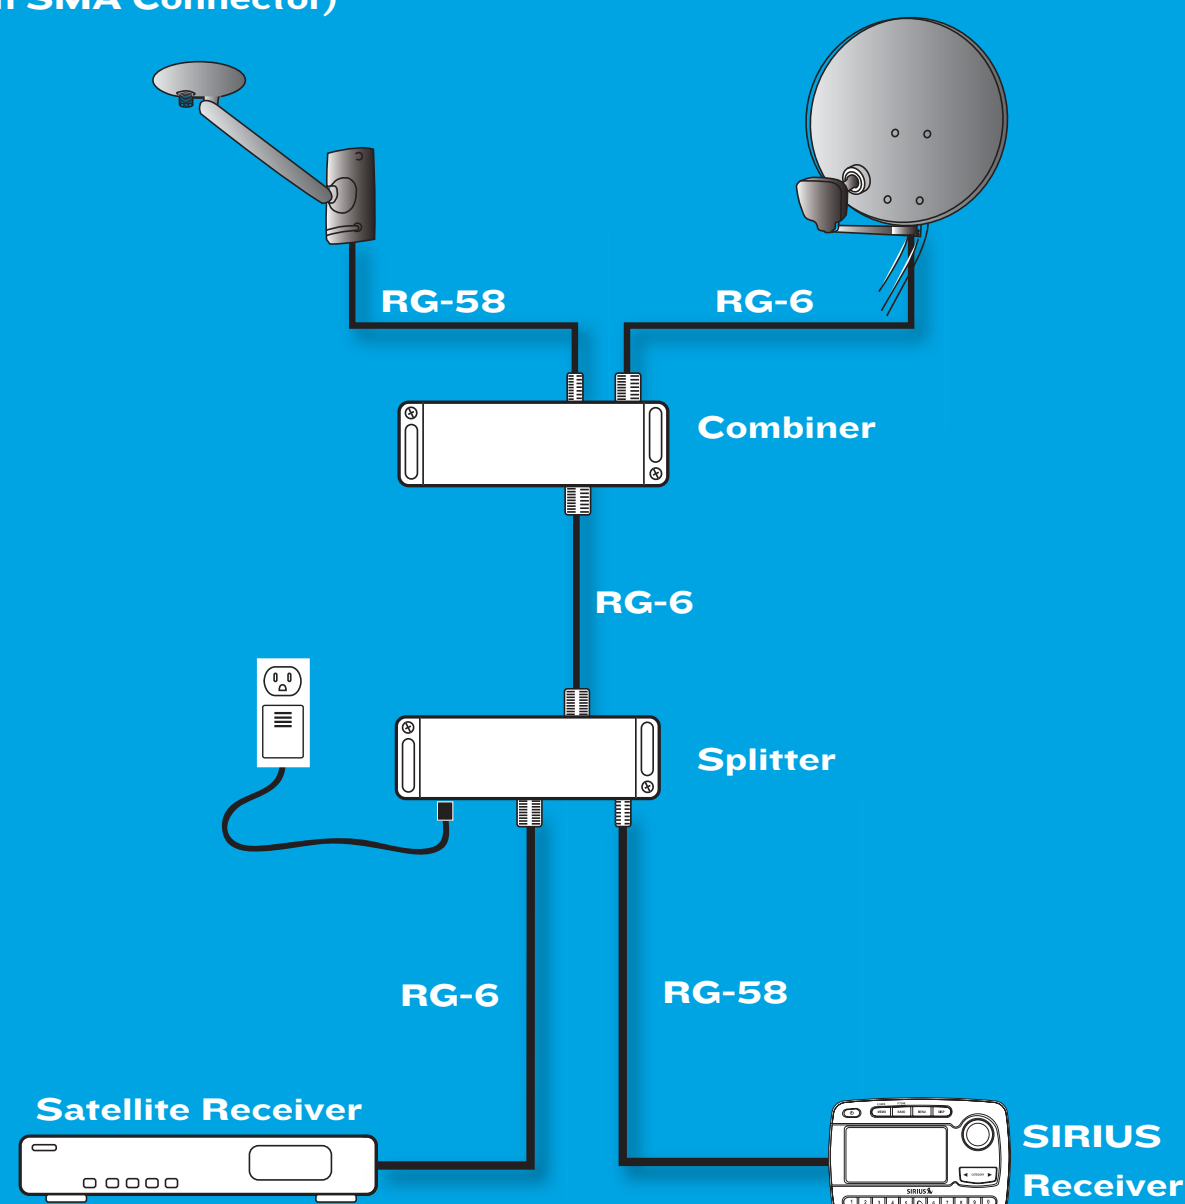

SIRIUS Outdoor Antenna
(with F Connector)

Dual Receiver Home Distribution Kit

- ▶ Connects up to 2 SIRIUS receivers using only one antenna
- ▶ Each receiver can be placed up to 150' away from antenna
- ▶ Compatible with commercially available, off-the-shelf RG-6 cables
- ▶ Includes mounting hardware, system splitter and F to SMB adapter cables

SIRIUS Outdoor Antenna
(with SMA Connector)

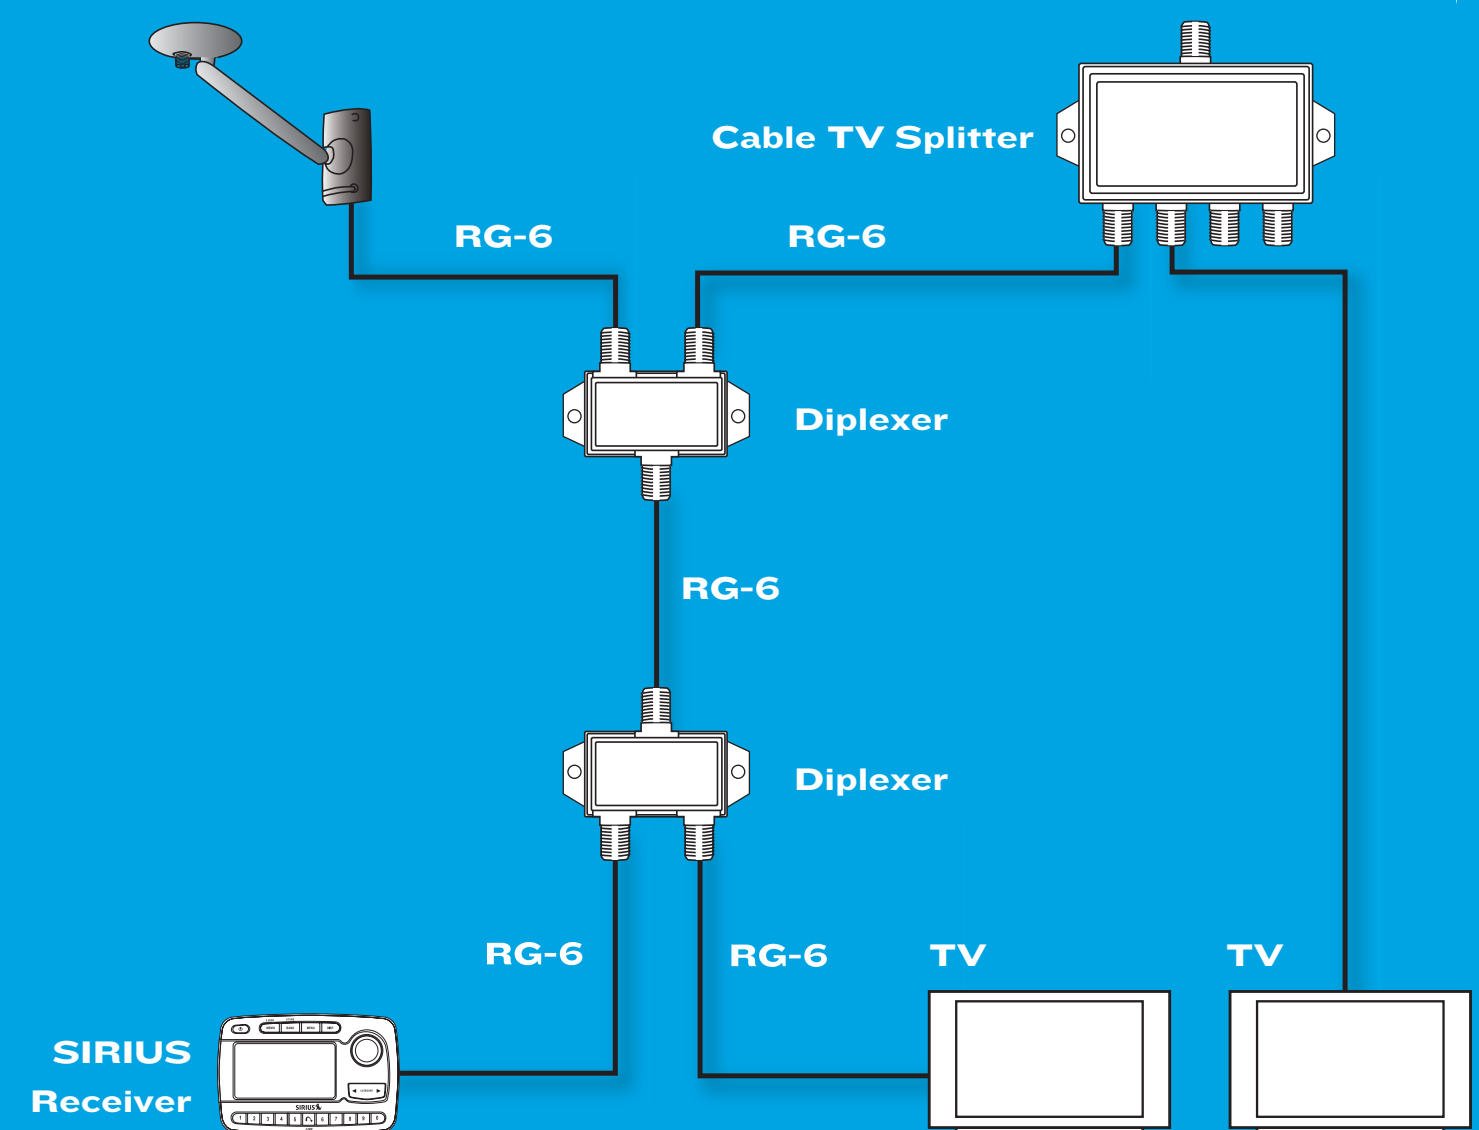

DBS Combiner/Splitter System

- ▶ Distributes the SIRIUS signal over existing DBS cable
- ▶ Eliminates the need for a separate cable installation
- ▶ Great for homes with existing satellite TV systems
- ▶ Allows up to a 200' run of regular RG-6 cable between combiner and splitter

New

SIRIUS Outdoor Antenna
(with F Connector)

CATV Based Home Distribution Kit

- ▶ Distributes the SIRIUS signal over existing CATV cable
- ▶ Receiver can be placed up to 150' away from antenna
- ▶ Can be combined with splitter for multiroom distribution
- ▶ Allows installation of receiver wherever there is a CATV outlet
